FLUID MILK AND CREAM REPORT

JULY 1962

Resume
1.9
M 34M

SUMMARY

Fluid milk prices in early July were steady to generally higher, the Crop Reporting Board reports. Dealers' buying prices were higher than a month earlier in 40 markets but lower in 6. Home delivery prices advanced in 23 markets but declined in only 3. Quarts at stores were higher in 23 markets but lower in 5. Half-gallons out-of-stores were up in 18 sales areas but down in 6. Gallon jug prices increased in 13 markets and decreased only in 1.

Prices paid by dealers in early July for fluid use milk in about 160 markets averaged \$5.27 per hundredweight, 17 cents above the previous month but 7 cents below a year earlier. The current average price in these markets is 2 cents lower than the 1956-60 average for the month. Increases from the previous month in 5 of the 9 regions varied from 66 cents per hundredweight in New England to 1 cent per hundredweight in the Mountain States. Other important increases were 13 cents per hundredweight in the West South Central and 12 cents in the West North Central areas. Except for a 12-cent increase in the Pacific States, all area averages were lower than a year earlier, with decreases ranging from 1 cent per hundredweight in New England to 29 cents in the West South Central Region. Other sizable declines from year earlier levels were: 28 cents per hundredweight in the Mountain States, 19 cents in the West North Central, and 13 cents in the South Atlantic. Smaller decreases in regional averages of 10 cents per hundredweight in the East South Central and 9 cents in the East North Central also occurred.

Prices per single quart for home delivered milk in 25 major markets in early July averaged 27.0 cents -- two-tenths cent above both a month and a year earlier. The current price is 1.7 cents per quart above the 1956-60 average of 25.3 cents. The single quart price in Boston and Hartford was $1\frac{1}{2}$ cents higher; in Philadelphia it was up 1 cent and in Chicago and Seattle up one-half cent per quart.

Whole milk sales (preliminary) on an average daily basis for the month of May in 68 Federal and 6 State marketing areas were fractionally higher than both a year earlier and April. Sales for the first 5 months of 1962 were 1 percent above the comparable period of 1961. Skim milk sales during April in 73 of these markets were 4 percent above a year earlier but 4 percent below March 1962. In 68 markets, April average daily sales of milk and cream mixtures (half-and-half) were 3 percent below the same month last year and 6 percent lower than March 1962. April sales of fluid cream were 3 percent lower than a year earlier and 4 percent below March. Average daily sales in April of all fluid products in 72 marketing areas were 1 percent above comparable 1961 figures but 6 percent below month earlier totals. Combined average daily receipts in 76 Federal Order and 5 State marketing areas were 5 percent higher than the previous month and 4 percent above May of last year. Deliveries per producer for the month of May at 858 pounds were 9 percent above the same month a year ago.

PRICES IN FLUID MILK MARKETS, JULY 1962

In New England, Class I prices in early July, at an average of \$6.01 per hundredweight, were 66 cents higher than in June but 1 cent lower than July last year. The Maine markets reporting were 66 cents per hundredweight above the previous month for Class I milk and about 1 cent per quart higher at homes and stores. New Hampshire Class I prices also were 66 cents per hundredweight over June. Selling prices were $1\frac{1}{2}$ cents per quart higher. Home and store prices in Vermont markets advanced 2 cents per quart. Dealers' buying prices in these markets are not currently reported. Class I prices in the Massachusetts, Rhode Island and Connecticut markets reporting were 66 cents per hundredweight higher. Home and store prices in these markets were generally $1\frac{1}{2}$ cents per hundredweight above June.

In early July, Middle Atlantic Class I prices averaged \$5.75 per hundredweight. This is 30 cents above June but 4 cents below July last year. The Class I price in the New York-New Jersey marketing area was up 38 cents per hundredweight. Home and store prices in Albany and Binghamton were unchanged. Home delivery prices in New York City and Schenectady were unchanged but store prices advanced 1 cent per quart. In Syracuse, home and store quarts were 1 cent per quart lower, but store half-gallons were unchanged. Home delivery prices in northern New Jersey were 1 cent per quart higher. Philadelphia, Class I prices increased 38 cents per hundredweight; home and store prices were 1 cent per quart higher than in June.

Dealers' buying prices for milk for fluid use in the East North Central region during July averaged \$4.50 per hundredweight--9 cents higher than June but 9 cents lower than July 1961. Class I prices in the greater Chicago Ill. area increased 29 cents per hundredweight. Home and store prices in both Gary, and Chicago were up 1 cent per quart. Rockford, Ill. Class I prices declined 17 cents per hundredweight. Comparable consumer prices for both months are not available at present. Rock Island, Ill. fluid use prices were up 20 cents per hundredweight but home and store prices were unchanged. Both upward and downward prices to consumers were reported for various containers in Grand Rapids, Mich. with continued price war conditions. Producer prices in this marked are not currently determined. Various Class I price changes by market were reported in Wisconsin as the Federal Order program covered additional communities in the southern portion of the State. Increases of 51 and 55 cents per hundredweight respectively, were reported in Beloit and Madison with a 26-cent drop in Milwaukee. Most of these changes were reflected at consumer levels. At Green Bay, Wis. Class I prices advanced 16 cents per hundredweight but home and store prices were unchanged.

West North Central fluid use prices in early July averaged \$4.09 per hundredweight. This is 12 cents higher than June but 19 cents less than July last year. Class I prices in Duluth, Minn. and Superior, Wis. were up 40 cents per hundredweight; home and store prices in these markets were unchanged. Minneapolis and St. Paul, Class I prices advanced 21 cents per hundredweight but consumer prices remained steady. In Des Moines and Ft. Dodge, Iowa, Class I prices were 20 cents per hundredweight greater. Store half gallons in Des Moines dropped 2 cents but other prices in these markets were unchanged. Class

I prices increased 20 cents per hundredweight in St. Louis and 13 cents in Springfield, Mo. other prices in these markets were unchanged. Lincoln, Neb. reported a 1 cent decrease in home and store quarts with store half gallons unchanged. Class I prices were unchanged from June to July in this market. Kansas City, Kan. reported a price war from June 18 to July 3. Home delivery quarts were 4 cents lower and half-gallons dropped nearly 10 cents. Some depression in prices in the Missouri portion of the area along the State line was also noted. After the disturbance was over prices returned to June levels.

Class I prices in the South Atlantic markets reporting averaged \$5.90 per hundredweight in early July, 2 cents less than June and 13 cents under July a year ago. Baltimore, reported a 12-cent per hundredweight increase in the Class I price with no change at consumer levels. There was a 20-cent per hundredweight decrease in Washington, D. C., Class I prices; no changes in home and store prices were reported.

Prices for fluid use milk in the East South Central Region averaged \$5.15 per hundredweight in early July. This is unchanged from June but 10 cents below July last year. Louisville, Ky. Class I prices were virtually unchanged with 2-to 8-cent increases reported in store half-gallons as the unsettled conditions reported last month relaxed. Class I prices increased 30 cents per hundredweight in Paducah, Ky. An increase of 1 cent in store quarts was also reported.

West South Central fluid use prices in early July averaged \$5.24 per hundredweight, 13 cents higher than June but 29 cents lower than July a year ago. In Fort Smith, Ark Class I prices were 39 cents per hundredweight above June but home and store prices were unchanged. Class I prices in Oklahoma City, were 7 cents per hundredweight lower, but a price war at the month's end resulted in half-gallons at stores selling for 10 cents less and gallons 28 cents lower than last month. Single quart prices were unchanged. Tulsa, Okla. Class I prices declined 36 cents per hundredweight. Home and store prices were unchanged. Austin, Tex., Class I prices were up 39 cents per hundredweight with no change at consumer levels. Dallas, Tex. Class I prices were also up 39 cents per hundredweight. Consumer prices were unchanged.

Dealers' buying prices in Mountain State markets averaged \$5.14 per hundredweight in early July. This is 1 cent under June and 28 cents below July 1961. The only price change reported in Albuquerque, New Mex. was a 1-cent increase in store quarts. Class I prices under the new Federal Order were 11 cents per hundredweight below June.

On the Pacific Coast, Class I prices in early July averaged \$5.32 per hundredweight, unchanged from June but 12 cents above July last year. The only important change reported for the region was an upward adjustment in home and store quarts in Seattle, Wash.

Omaha, Nebr.....	22.3	24	24	24	25 cities average..	25.3	26.8	26.8	27.0

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

S-From State sources. D.R.-Payment in direct ratio to milkfat. PA-Producers' association prices.

a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. j. Average of blend prices paid by all plants in the State. k. Louisiana Milk Commission minimum price. m. Mississippi Milk Commission minimum price. p. Weighted average of area pools. q. The following changes have been made for fall production fund: Subtracted:

Connecticut	15¢	Lou-Lex-Evansville	39¢	Neb-Western Ia.	32¢
Col-Dayton-Spg		Sub.St. Louis-St. Louis-Ozarks	10¢	Ft. Wayne	34¢
Cin.-Ind.	35¢	Sioux City	30¢		

r. Basic test: Blend Feb. \$4.726, fat diff 8.0¢; Class I March \$4.698, blend \$4.379 fat diff 7.6¢; Class I April \$4.591 blend \$3.99 fat diff 7.0¢. s. \$5.45 for April.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, APRIL-MAY 1962

May whole milk sales fractionally above a year earlier

Whole milk sales for the month of May (preliminary) at 81.9 million pounds per day, in 68 Federal order and 6 State marketing areas were fractionally above the 81.4 million pounds per day for May 1961. This is also slightly above the 81.6 million pounds daily in April 1962. Cumulative sales for the first 5 months of this year were 1 percent above a year earlier. The average milkfat test of sales for April was 3.54 percent, compared with the April a year ago test of 3.56 percent and the March 1962 average of 3.55 percent.

April skim milk sales up 4 percent

Daily average sales of all skim products for 73 marketing areas during April were 4 percent above April 1961. April sales were above a year earlier in most of these markets with only 8 showing decreases. Compared with month-earlier deliveries, April volume was 4 percent lower. The March to April decline was general, with all markets except one below March. Skim milk sales in the first 4 months of this year were 6 percent above the corresponding period of last year. The average milkfat test of sales of skim milk items for April, at 1.15 percent, compares with 1.16 percent for the previous month, and 1.13 percent for April 1961.

Sales of milk and cream mixtures down 3 percent from April a year ago

Average daily sales of milk and cream mixtures in 68 markets during April were 3 percent below the same month last year and 6 percent smaller than the March 1962 level. Sales patterns by markets continued mixed. Sales in Chicago and California were down 7 and 5 percent, respectively, from April a year ago, but in Southern Michigan, sales were up 2 percent. These three markets together accounted for about half of the sales for the 68 market-group. The total of the remaining markets was unchanged from April 1961.

Fluid cream sales also off 3 percent from April last year

April sales of fluid cream (excluding mixtures) for 69 markets (average daily) were 3 percent lower than a year earlier. Compared with March, sales were down 4 percent. Of the 42 area groupings shown in table 11, sales in 30 were below April a year ago. Deliveries in 10 were higher than April 1961, but in 2, sales were unchanged. Sales in the first 4 months of 1962 were 1 percent below the comparable period of last year. The average April milkfat test of cream sold was 24.6 percent compared with the average of 24.5 percent in the same month a year ago and a test of 24.3 percent in March 1962.

April sales of all fluid products slightly higher

Sales of total fluid products in 72 of the 74 marketing areas, at 74.4 million pounds per day during April, were 1 percent above comparable 1961 sales. At the same time, however, daily sales were 6 percent below the March average. Only 9 area groupings showed lower sales than in April a year ago; these were Chicago, Boston, the Northern Ohio market group, Philadelphia, Niagara Frontier, Milwaukee, the Indiana market group, the Kansas market group, and Wilmington. Cumulative sales of all fluid products for the first 4 months of 1962 were 2 percent above a year ago. The only market groupings showing declines in the 4-month totals were Boston, Philadelphia, Niagara Frontier, the Indiana markets, and Wilmington. The average milkfat test of all fluid products during April was 3.66 percent, slightly below a year earlier, but equal to the March average.

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
c. Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.
e. Preliminary. r. Revised.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets - Louisville-Lexington - Evansville, Paducah; Tennessee - Chattanooga, Knoxville, Memphis, and Nashville; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

Receipts during May up 4 percent from last year

Average daily receipts of milk in 76 Federal Order and 5 State marketing areas were 4 percent above May last year. Compared with a month earlier, May receipts were 5 percent higher. Average daily deliveries during May, at 858 pounds per producer, were 9 percent greater than the same month last year. The average milkfat test for May receipts, at 3.63 percent, compares with 3.67 percent for April, and 3.66 percent in May a year ago.

June milk production unchanged from a year earlier

June milk production in the United States, estimated at 12.0 billion pounds, was practically unchanged from June 1961. This marks the first month since February 1961 that production has failed to show any appreciable gain over the comparable month a year earlier. June production was down 3.9 percent from May compared with the recent 10-year average decline of 2.7 percent. Cumulative production for the first 6 months of 1962 exceeded output in the same period of 1961 by 1.4 percent. Production for the month was at a level sufficient to supply 2.16 pounds of milk per person compared with 2.20 pounds for June a year ago.

FLUID MILK AND CREAM REPORT

AUGUST 1962

August 17, 1962

SUMMARY

Reserve
1.9
M 34M

Fluid milk prices in early August were steady to generally higher, the Crop Reporting Board reports. Dealers' buying prices for fluid use milk were above a month earlier in 43 markets and below in 2. Single quart home delivery prices advanced in 23 markets and declined in only 1. Quarts purchased out-of-stores were higher in 24 markets and lower in 3. Half-gallons at stores were up in 26 markets but down in 2. Gallon jug prices increased in 12 markets and decreased in 3.

Prices paid by dealers in August for fluid use milk in about 160 markets averaged \$5.40 per hundredweight, 13 cents above the previous month but 1 cent below a year earlier. The current average price in these markets is 1 cent less than the 1956-60 average for the month. Increases from a month earlier occurred in 8 of the 9 regional averages, while the Pacific Coast average was unchanged. The regional increases from July ranged from 3 cents per hundredweight in the South Atlantic and Mountain areas to 24 cents per hundredweight in the Middle Atlantic States. Other regions showing large increases were New England, 22 cents; West North Central and East South Central, 16 cents. Smaller increases were 8 cents per hundredweight in the East North Central and 7 cents per hundredweight in the West North Central areas.

Prices per single quart for home delivered milk in 25 major markets in early August averaged 27.1 cents -- one-tenth cent above a month earlier and three-tenths cent above August 1961. The current price is 1.6 cents per quart above the 1956-60 average of 25.5 cents. In the 25 major markets, the single quart home delivered price was 1 cent higher in Pittsburgh and Detroit and was up one-half cent in Boston.

Average daily whole milk sales (preliminary) in 68 Federal Order and 6 State marketing areas during June were 2 percent higher than a year earlier, but 3 percent less than in May. Cumulative sales for the first half of 1962 were 1 percent higher than in the comparable period of 1961. May skim milk sales in 73 marketing areas were 8 percent higher than a year earlier and 3 percent above April. Average daily sales of milk and cream mixtures during May in 68 marketing areas were 3 percent below a year earlier, but 1 percent above April. Fluid milk and cream sales (excluding mixtures) during May were 5 percent lower than in the same month of last year, but 5 percent above April. Total fluid product sales in May were 1 percent above a year earlier in 72 comparable markets. Total sales of fluid products for the first 5 months of 1962 were nearly 2 percent above the same period of 1961.

Washington, D. C.

PRICES IN FLUID MILK MARKETS, AUGUST 1962

Prices paid by dealers for fluid use milk in New England markets in August averaged \$6.23 per hundredweight, 22 cents higher than July and 21 cents above August a year ago. Dealer prices in Maine were 22 cents per hundredweight above July, and except for store quarts in Portland which were unchanged, all other store and home delivered prices were one cent per quart above July. New Hampshire prices were up 22 cents per hundredweight from a month earlier. Reported store and home delivered prices were generally $\frac{1}{2}$ cent per quart higher except for store quarts which advanced $1\frac{1}{2}$ cents. Selling prices were one cent per quart above July in Burlington, Vermont, but were unchanged in Bellows Falls. Dealers' buying prices in these markets are not currently determined. Class I prices in the Massachusetts, Rhode Island, and Connecticut markets reporting were 22 cents per hundredweight higher than in July. Home delivered and store prices were up $\frac{1}{2}$ cent except in Worcester where gallon prices advanced generally one cent per quart.

The Middle Atlantic Region price paid by dealers for fluid use milk averaged \$5.99 per hundredweight for August. This amounted to an increase of 24 cents per hundredweight from the July price and 6 cents more than the August 1961 price. Class I prices in the New York-New Jersey marketing area were up 28 cents per hundredweight in August. New York City home delivered quarts were unchanged but store prices advanced $\frac{1}{2}$ to 1 cent per quart. Schenectady selling prices were unchanged except for a 4-cent decline for gallons out-of-stores. Home delivered and store quarts increased one cent in Syracuse. Home and store prices in Albany and Binghamton were reported unchanged. Class I prices were up 21 cents per hundredweight in Philadelphia and 39 cents in Pittsburgh. Home and store prices in Philadelphia were unchanged but were one cent per quart higher in Pittsburgh effective August 1.

Prices paid by dealers for fluid use milk in the East North Central Region in August averaged \$4.58 per hundredweight -- 8 cents above a month earlier but 10 cents below August 1961. Dealers' buying prices in South Bend were down 12 cents per hundredweight while store selling prices were unchanged. Class I prices in Alton and Rock Island, Illinois advanced 22 cents per hundredweight in August. Half-gallons at Alton rose 3 cents for sales in independent stores but declined $6\frac{1}{2}$ cents in chain stores. Rock Island selling prices were 1 cent per quart higher for both delivered and out-of-store sales while gallons out-of-stores were $\frac{3}{4}$ cent per quart higher. Green Bay, Wisconsin Class I prices increased 22 cents per hundredweight but selling prices were unchanged from early July. Beloit, Wisconsin fluid use prices were unchanged but out-of-store quart prices advanced 1 cent on the low range of reported prices and 2 cents for half-gallons. Milwaukee reported prices for some store quarts increased 1 cent, while sales in gallon jugs advanced $\frac{1}{2}$ cent per quart.

August prices for fluid use milk in the West North Central area, at \$4.25 per hundredweight, were 16 cents above July but 14 cents below August of last year. Des Moines and Ft. Dodge, Iowa reported an increase in Class I prices, 22 cents per hundredweight. Except for a 2-cent per quart increase in half-gallon out-of-store sales, all other prices were unchanged. Missouri consumer prices held steady but Class I prices were up 32 cents per hundredweight in Kansas City and 22 cents in St. Louis and Springfield. Prices for fluid use milk in Grand Forks,

North Dakota advanced 18 cents per hundredweight and selling prices increased $\frac{1}{2}$ cent per quart for both home delivery and store sales. In Aberdeen, Class I prices were 14 cents per hundredweight above the month earlier level but consumer prices were generally steady. Class I prices increased 32 cents from July to August in Kansas City and Topeka, Kansas. Continued price war activity in Kansas City, Kansas resulted in a 14-cent decline in store half-gallon prices in early August. Other prices in these markets were reported unchanged.

South Atlantic Region prices paid by dealers for fluid use milk averaged \$5.93 per hundredweight in August. This price compares with the month earlier average of \$5.90 per hundredweight and with \$6.04 per hundredweight in August 1961. Huntington, West Virginia reported an increase of 93 cents per hundredweight for fluid use milk. Single quart home delivered prices advanced $1\frac{1}{2}$ cents per quart.

Dealers prices for fluid use milk in the East South Central Region averaged \$5.31 per hundredweight in August. This is 16 cents above a month earlier and 4 cents more than August of last year. Paducah Class I prices moved up 32 cents from July. Home delivery and store quarts increased 1 cent while half-gallons were 1 to 2 cents higher. Chattanooga fluid use milk prices were 38 cents per hundredweight above July. Store half-gallons were 6 to 7 cents higher while store gallons increased 10 to 11 cents. Knoxville Class I prices advanced 37 cents per hundredweight but retail prices were unchanged. Memphis reported decreases of 1 cent in store quart prices and 2 to 3-cent declines in store half-gallons. Nashville Class I prices were reported up 35 cents per hundredweight but home delivered and store quarts were down 1 cent.

West South Central area fluid use prices in early August averaged \$5.31 per hundredweight. This is an increase of 7 cents from July but is 23 cents below the corresponding month of last year. Dealer buying prices in Fort Smith advanced 9 cents per hundredweight but store half-gallon prices were 1 cent higher. Shreveport dealer prices were unchanged but store half-gallons were 2 cents higher and gallons 1 cent higher. Class I prices in Oklahoma City were 16 cents per hundredweight higher while home delivered and store quarts advanced 1 cent. Following price war conditions in July, store prices for half-gallon and gallons increased 11 cents and 30 cents, respectively, in early August. Store quart prices in Dallas increased 1 cent but gallon prices were reported 1 cent lower. In El Paso, consumer prices for quarts and half-gallons were up 1 cent per quart. Galveston fluid use milk prices were up 45 cents per hundredweight but home and store prices were unchanged.

Mountain States dealers in early August paid an average of \$5.16 per hundredweight for milk used for fluid purposes. This is 3 cents above July but 23 cents below August of 1961. The only change reported was in Tucson where Class I prices declined 25 cents per hundredweight.

Dealers buying prices for fluid use milk on the Pacific Coast averaged \$5.32 per hundredweight in August. This price was unchanged from July but was 12 cents above August last year. The only change reported was in Santa Barbara, California, where gallon prices declined 2 cents.

Omaha, Nebr.....	22.6	24	24	24	25 cities average..	25.5	26.8	27.0	27.1

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it assumed that under every other day delivery the charge represents a two quart purchase.

S-From State sources. D.R. Payment in direct ratio to milkfat. PA-Producers' association prices.

a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. FMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. j. Average of blend prices paid by all plants in the State.

k. Louisiana Milk Commission minimum price. m. Mississippi Milk Commission minimum price. p. Weighted average of area pools. q. The following changes have been made for fall production fund: Subtracted:

Connecticut	15¢	Cincinnati	35¢	Indianapolis	34¢	Nebr.-Wes.	32¢
Columbus	35¢	Ft. Wayne	34¢	Sub. St. Louis	10¢	St. Louis	10¢
Dayton-Spfg.	35¢	Lou.-Lex.-Evans.	39¢	Sioux City	30¢	Ozarks	10¢

r. Negotiated Class I \$4.90 for May. s. May price the same as June instead of as shown. t. Basic test \$5.68; 3.5% test \$5.38 for May.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, MAY-JUNE 1962

Whole milk sales during June 2 percent higher than in 1961

Average daily sales of whole milk (preliminary) in 68 Federal Order and 6 State marketing areas during June were 79.3 million pounds daily. This is 2 percent greater than the 77.9 million pounds per day in June last year. The seasonal decline from May 1962 was 3 percent. Cumulative sales for the first half of 1962 were 1 percent higher than January-June sales in 1961. The average milkfat test of sales of whole milk items for May was unchanged from both May of last year and April of this year.

May skim milk sales increase 8 percent

May data for 73 marketing areas show average daily sales of fluid skim milk products 8 percent above the year-earlier level and 3 percent above April 1962. Most marketing areas registered increases from a year earlier, three were unchanged, and 5 decreased. Sales during the first 5 months of the year in the 73 comparable marketing areas were 7 percent above the 1961 volume. With the exception of the Springfield-Worcester, Southeast New England, and Philadelphia markets, all areas showed higher sales during the first 5 months of 1962 than in the same period of 1961. The average milkfat test of skim milk products during May was 1.16 percent, compared with the year-earlier test of 1.12 percent. The higher fat test for this group of products in 1962 compared with 1961 reflects increased consumption of milk with about 2.0 percent fat content. Sales of this product became legal in California for the first time in April 1962.

Milk and cream mixture sales 3 percent below last year

During the month of May, daily average sales of milk and cream mixtures in 68 marketing areas were 3 percent lower than in that month last year but 1 percent higher than in April this year. The three large marketing areas of Chicago, Southern Michigan, and California combined, which accounted for over one-half of total sales in the 68 areas, experienced a 4-percent decline in sales compared with May a year ago. In the remaining markets as a group, sales were down 2 percent from May 1961. The average milkfat test of milk and cream mixtures, at 11.8 percent for May, was unchanged from both a year earlier and April 1962.

Sales of fluid cream decline 5 percent

Average daily sales of fluid cream (excluding mixtures) for 69 marketing areas during May were 5 percent lower than in the same month of last year. However, May sales were 5 percent above April. In the first 5 months of 1962, sales were 2 percent below year-earlier levels in the 69 comparable marketing areas. Of the 42 market groupings for which data are shown, sales were below a year earlier in 27, unchanged in 2, and higher in 13. The May average milkfat test of fluid cream was 25.0 percent, 0.3 percent below May 1961, but 0.4 percent above the April 1962 average.

Total fluid product sales advance 1 percent

Combined May sales of all fluid products in 72 comparable markets, at 74.9 million pounds per day, were 1 percent higher than in the same month last year. About four-fifths of these markets recorded increased sales. Sales for the first 5 months of 1962 were nearly 2 percent above the corresponding period of 1961. Practically all markets showed higher sales. The only exceptions were Boston, Philadelphia, Chicago, and Wilmington. The average milkfat test of all fluid products, at 3.66 percent, was 0.4 percent below a year earlier, but unchanged from April.

Continued on page 27-

a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
S- Data from State sources. d. Data comprise plant receipts of Grade A milk from producers in the State.
e. Preliminary.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets - Louisville-Lexington - Evansville, Paducah; Tennessee - Chattanooga, Knoxville, Memphis, and Nashville; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

June receipts up 1 percent from 1961

Average daily receipts of milk during June in 76 Federal Order and 5 State marketing areas were 1 percent higher than June a year ago. June receipts were 5 percent lower than in May. Receipts per producer averaged 816 pounds per day during June, 4 percent greater than in June 1961. The average milkfat test of receipts for June was 3.59 percent, compared with 3.60 percent for June last year, and 3.63 percent for May 1962.

July milk production 1 percent below 1961

July milk production in the United States is estimated at 10,977 million pounds, about 1 percent less than in July 1961 and 2 percent below the 1951-60 average for the month. Revised June 1962 milk production, at 12,003 million pounds, is slightly below June 1961 output. Prior to June, milk production had been above a year earlier for 15 consecutive months. July production provided 1.90 pounds of milk per person daily, compared with 1.95 pounds a year earlier. For the first 7 months of the year, milk production totaled about 1 percent more than in the corresponding period of 1961.

July milk production was below a year earlier in 18 of the 36 States for which monthly estimates are available. Important dairy States where July production was 2 percent or more below 1961 include New York, Pennsylvania, Minnesota, and Iowa. July production was at record low levels for the month in 7 States-- South Dakota, Nebraska, West Virginia, South Carolina, Georgia, Colorado, and Oregon. California was the only State with record high production for July.

FLUID MILK AND CREAM REPORT
SEPTEMBER 1962

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

OCT 3 - 1962

September 18, 1962

CURRENT SERIAL RECORDS
SUMMARY

Early September prices for fluid-use milk continued a generally upward seasonal advance, the Crop Reporting Board reports. Dealers' buying prices were higher than a month earlier in 15 markets, about 1 in every 11. Home delivery quarts were higher in 22 markets, but lower in 4. Store prices were higher in 28 markets for quarts, in 22 markets for half-gallons, and in 9 markets for gallons. Lower store prices were: quarts, 6 markets; half-gallons, 9 markets; and gallons, 3 markets.

Dealers' buying prices for milk for fluid purposes in about 160 markets averaged \$5.46 per hundredweight in early September. This is 7 cents above August, but 3 cents below September last year. Compared with the 1956-60 average for the month, the September price this year was 7 cents per hundredweight lower. Increases in regional averages occurred in all areas except the West North Central, South Atlantic, and Pacific, which were unchanged. The most important increase was in the Middle Atlantic area. Compared with September last year, area averages were lower in all regions except the New England and the Middle Atlantic States, which were 22 cents and 7 cents per hundredweight higher, respectively. The largest decreases from the year-earlier averages were 18 cents per hundredweight in the Mountain States and 12 cents in the Pacific Region.

Prevailing prices of the most common grade of whole milk delivered to homes in 25 major markets averaged 27.1 cents per quart in early September. This is unchanged from the month earlier average but two-tenths of a cent above September 1961. The current average price is 1.4 cents per quart above the 1956-60 average for the month. Minneapolis and Portland, Oregon prices were up 1 cent per quart, the only changes from last month in this group of markets.

Whole milk sales (preliminary) in 68 Federal Order and 6 State marketing areas during July averaged 75.2 million pounds daily -- 1 percent above a year earlier, but 5 percent below June. Cumulative sales of whole milk in the first 7 months of 1962 were 1 percent higher than the corresponding period last year. Skim milk sales in 73 of these areas during June averaged 8 percent above last year, but unchanged from May. Sales of milk and cream mixtures (half-and-half) for 68 areas in June were about equal to year earlier figures, but were 2 percent higher than a month earlier. June sales of other fluid cream items in 69 areas were also unchanged from year earlier levels, but were 1 percent higher than in May. Combined sales of all fluid products during June in 72 marketing areas were 3 percent above a year earlier but 3 percent below a month earlier.

PRICES IN FLUID MILK MARKETS, SEPTEMBER 1962

New England Class I prices in early September averaged \$6.24 per hundredweight -- 1 cent above August and 22 cents above the same month last year. Concord, New Hampshire store quart prices were 1 cent lower. Class I prices in this market were virtually unchanged. Burlington, Vermont home and store quarts were down 1 cent, while store half-gallons declined 2 cents. Producer prices in this market are not currently determined.

Early September Class I prices in the Middle Atlantic Region averaged \$6.15 per hundredweight. This is 18 cents per hundredweight higher than August and 7 cents more than the September 1961 average. The Class I price in the New York-New Jersey marketing area increased 26 cents per hundredweight from August. In Binghamton, some half-gallons out-of-stores were down 4 cents. New York City reported some store quarts up 1 cent, while store half-gallons were generally 1 cent higher. Syracuse home delivery quart prices declined 1 cent and some store quarts were down 1 cent. Northern New Jersey consumer prices were unchanged. In Pennsylvania, all markets except Philadelphia and Pittsburgh reported increases of 40 cents per hundredweight in Class I prices. Store and home delivery prices in these markets were generally 1 cent per quart higher.

Prices paid by dealers for fluid use milk in the East North Central Region averaged \$4.62 per hundredweight in early September -- 3 cents above the previous month, but 7 cents below the corresponding period of last year. Akron dealer buying prices were unchanged, but home and store quarts advanced 1 cent. Canton Class I prices were unchanged, but store quarts gained 1 to 2 cents, while some half-gallons advanced 1 cent. Some store quarts in Cleveland increased 1 cent over August levels. Columbus dealer prices were up slightly, but consumer price changes were mixed. Some home delivered quarts were off 1 cent, while store quarts generally increased 1 cent. Half-gallons in some stores gained 3 cents, while gallons were up 3 cents. Dealer buying prices in Alton, Peoria, Rockford, and Rock Island, Illinois were generally steady, while consumer price movements were mixed. Alton's half-gallon prices were down 4 to 17 cents, while in Peoria some half-gallons increased 3 cents and gallons 2 to 18 cents. Rock Island store quarts and half-gallons declined 1 and 2 cents, respectively, but gallons increased 4 cents in some cases. Rockford consumer prices were generally down one-half cent per quart in all container sizes. Unsettled price conditions continued at the retail level in Grand Rapids where store quarts increased 2 cents. Producer prices in this market are not currently determined. Beloit, Wisconsin, reported a decrease of $1\frac{1}{2}$ cents for some store quart prices and 4 cents for some half-gallons. Class I prices in this market were unchanged.

In the West North Central States, fluid use milk prices in early September averaged \$4.25 per hundredweight -- unchanged from August, but 14 cents below September a year earlier. Class I premiums were being paid to those producers who were taking their cows off pastures and feeding only stored feed in the Minneapolis-St. Paul and Duluth-Superior markets. This measure had been taken to assure protection against nuclear fallout contamination. The effect of these premiums on the average Class I price paid by dealers in these markets is not known at this time. Price increases of about 1 cent per quart at homes and

stores were reported for these markets. Small variations in home and store prices were reported for Burlington and Fort Dodge, Iowa, and Aberdeen, South Dakota. Class I prices were unchanged in Topeka. Home and store prices were up about 1 cent per quart.

In the South Atlantic States, average prices of milk for fluid use in early September were \$5.93 per hundredweight. This is unchanged from August, but 11 cents below September 1961. Class I prices in Durham, North Carolina, were unchanged from August, but home and store prices advanced 1 cent per quart.

Dealers' buying prices for fluid use milk in the East South Central area averaged \$5.26 per hundredweight -- 4 cents above August, but 9 cents below September 1961. Nashville Class I prices were up 35 cents per hundredweight. Home delivery prices were 2 cents per quart higher and store sales 1 cent per quart above August.

West South Central dealers paid an average of \$5.40 per hundredweight for milk for fluid use in early September. This is 9 cents higher than August but 5 cents lower than September last year. Unchanged fluid use prices in Little Rock were accompanied by a 1-cent per quart increase in home and store quarts and a 3-cent per half-gallon out-of-store rise. The Class I price in Oklahoma City was 16 cents per hundredweight over August, but other reported prices were unchanged. Galveston reported unchanged dealers' buying prices, but a 1-cent per quart advance to consumers. A Class I price increase of 45 cents per hundredweight and a home delivery price rise of 1 cent per quart were reported for Houston.

Prices for fluid use milk in the Mountain States in early September averaged \$5.18 per hundredweight. This is 1 cent higher than August, but 18 cents less than September 1961. The only important price change reported for the region was a 1-cent rise per quart in home and store prices in Boise, Idaho.

Early September dealers' buying prices for milk for fluid use in the Pacific Region averaged \$5.32 per hundredweight -- unchanged from August, but 12 cents under September last year. Class I prices in Seattle were the same as August, but store half-gallons declined from one-half to 2 cents. Spokane fluid use prices were slightly lower, but home and store quotations were 1 cent per quart higher. Medford, Oregon reported a small Class I price increase. Home delivery quarts were up 2 cents, store quarts 1 cent, and half-gallons and gallons $1\frac{1}{2}$ cents per quart. Class I prices in Portland and Salem, Oregon were unchanged with home and store prices 1 cent per quart above August.

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it assumed that under every other day delivery the charge represents a two quart purchase.

S-From State sources. D.R. Payment in direct ratio to milkfat. PA-Producers' association prices.

a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. j. Average of blend prices paid by all plants in the State. k. Louisiana Milk Commission minimum price. m. Mississippi Milk Commission minimum price. p. Weighted average of area pools. q. The following changes have been made for fall production fund: Subtracted:

Cincinnati	20¢	Lou.-Lex.-Evans.	39¢	St. Louis	10¢
Columbus	35¢	Indianapolis	34¢	Ozarks	10¢
Dayton-Spfg.	30¢	Sub. St. Louis	10¢		

Added: Connecticut 17¢.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, JUNE-JULY 1962

Sales of whole milk during July 1 percent above a year earlier

July average daily sales of whole milk (preliminary) in 68 Federal Order and 6 State marketing areas were 75.2 million pounds. At this rate, sales were 1 percent above the 74.7 million pounds daily in July of last year but were 5 percent below the June level of 79.5 million pounds per day. Cumulative sales in the first 7 months of 1962 were 1 percent above the comparable period of 1961. The average milkfat test of sales of whole milk in June at 3.55 percent was the same as both May of 1962 and June of last year.

Skim milk sales in June 8 percent above last year

Sales of fluid skim milk products (average daily) in 73 marketing areas during June were 8 percent above a year earlier but unchanged from May. Most marketing areas registered higher sales than a year earlier. However, in 8 areas sales were below June 1962 levels. Accumulated sales for the first half of 1962 were 7 percent above the comparable period of 1961. In only the 4 marketing area groups of New Jersey, Philadelphia, Southeastern New England and Springfield-Worcester, Mass., were the 6-month totals running below year earlier levels. The average milkfat test of skim milk products at 1.17 percent in June compared with the May average of 1.16 percent and the June 1961 average of 1.13 percent.

June half-and-half sales unchanged from a year ago

Average daily sales of milk and cream mixtures (usually known as half and half) in 68 marketing areas were unchanged from June 1961 but were 2 percent higher than May 1962. Total mixture sales in Chicago, Southern Michigan, and California, which collectively account for slightly more than half of sales in the 68 markets, were about 1 percent below a year earlier. Sales were 2 percent lower in both Chicago and California but were 5 percent higher in Southern Michigan. All the remaining markets combined reported June sales 2 percent greater than last year.

Fluid cream sales for June about the same as 1961

Sales of fluid cream items (average daily)(excluding mixtures) during June in 69 marketing areas were unchanged from June of last year but were 1 percent above May 1962. Total sales for the first 6 months of 1962 in these areas were 1 percent below the corresponding period of 1961. Of the 42 market groupings shown in Table 11, 28 recorded sales lower than the first half of 1961 while in 14 groups sales were higher. The average milkfat test of June sales at 24.7 percent compares with 25.0 percent in May and 24.8 percent in June 1961.

Total fluid product sales during June increase 3 percent from last year

Combined June sales of all fluid products in 72 marketing areas, were 3 percent above a year earlier but 3 percent below a month earlier. Cumulative sales of all fluid products in the first 6 months of 1962 were 2 percent above the comparable period of 1961. The only marketing areas failing to show total sales of fluid items above the first half of 1961 were Boston, Springfield, and Worcester, Mass., Niagara Frontier, Philadelphia, Wilmington and the Red River Valley. The average milkfat test in June of 3.67 percent compared with 3.68 in May and 3.70 percent in June 1961.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets - Louisville-Lexington - Evansville, Paducah; Tennessee - Chattanooga, Knoxville, Memphis, and Nashville; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas- Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

July receipts 1 percent above a year earlier

Receipts of milk during July in 76 Federal Order and 5 State marketing areas on an average daily basis were 1 percent above July 1961. However, July receipts were 12 percent lower than in June. Receipts per producer in July averaged 725 pounds per day, 5 percent greater than July 1961. The average milk fat test of receipts was 3.58 percent in July compared with the June average of 3.59 percent and the July 1961 average of 3.60 percent.

August milk production slightly below a year earlier

Estimated milk production in the United States during August at 10.2 billion pounds was three-tenths of a percent below a year earlier and about the same percentage below the 1951-60 average for the month. Cumulative production for the first 8 months of the year was 87.9 billion pounds--1 percent above the corresponding total of last year. Seasonally, milk production declined 7 percent from July to August as compared with the usual 8 percent. By supplemental feeding many dairymen maintained milk production levels during the month in spite of poor pasture conditions. Per capita production in August was 1.77 pounds per day compared with 1.81 pounds during the same month last year, and 1.99 pounds for the August 10-year average.

Growth Through Agricultural Progress

FLUID MILK AND CREAM REPORT
OCTOBER 1962

U. S. DEPT. OF AGRICULTURE
NATIONAL AGRICULTURAL LIBRARY

October ~~JAN~~ 1972 1963

SUMMARY

CURRENT SERIAL RECORDS

Milk for fluid use prices in early October made about the same seasonal advance as last year, the Crop Reporting Board reports. Class I prices increased in 12 markets but decreased in 2. Home delivery prices were up in 9 markets but down in 5. At stores: quarts were higher in 14 markets, lower in 10; half-gallons advanced in 16 markets, declined in 12; and gallon prices gained in 8 but lost in 7.

Average dealers' buying prices for milk for fluid use in about 160 markets, at \$5.51 per hundredweight in early October, advanced 5 cents from September. The average this month is 2 cents above October last year but 11 cents lower than the October 1956-60 average. Buying prices were higher in 6 regions, about the same in 2, but lower in 1. Compared with year earlier figures, the October 1962 average was higher by 22 cents per hundredweight in New England and 8 cents in the Middle Atlantic Region. All other areas reported lower averages than last year. Decreases of 24 and 22 cents per hundredweight, respectively, occurred in the Mountain and West South Central Regions. Moderate reductions of 14 cents per hundredweight in the West North Central and 13 cents in Pacific States were reported. Minor decreases from year earlier levels were: East South Central, 8 cents per hundredweight; East North Central, 7 cents; and South Atlantic, 1 cent.

Single quart prices for the most common grade of whole milk delivered to homes in 25 cities averaged 27.2 cents per quart in early October. This is three-tenths of a cent above October 1961 and one-tenth of a cent higher than September. The current average price is 1.3 cents per quart above the 1956-60 October average. Increases of one cent per quart were experienced in Philadelphia, Washington, D. C., and Denver. A one-half cent per quart increase was recorded in San Francisco. A decline of 1 cent per quart occurred in Minneapolis. All other markets were unchanged.

Sales of whole milk (preliminary) in 68 Federal Order and 6 State marketing areas during August averaged 78.2 million pounds daily, 1 percent more than a year earlier and 4 percent above the previous month. Cumulative sales of whole milk in the first 8 months of 1962 were 1 percent larger than in the similar period of last year. Average daily sales of skim milk during July in 73 of these markets were up 6 percent from a year earlier, but were 6 percent below June. July sales of milk and cream mixtures (half-and-half) in 68 markets were down 1 percent from a year earlier and 7 percent less than in June. Fluid cream sales (excluding mixtures) were 3 percent lower than July last year and were 12 percent below June. Combined sales of all fluid products were unchanged from a year earlier but declined 6 percent from June.

PRICES IN FLUID MILK MARKETS, OCTOBER 1962

Early October Class I prices in New England markets averaged \$6.24 per hundredweight. This is unchanged from September but 22 cents above October last year. The only reported change in prices for the region was about a one-half cent per quart increase in half-gallons in Burlington, Vermont. Producer prices in this market are not currently determined.

Middle Atlantic Class I prices in early October averaged \$6.29 per hundredweight--14 cents higher than September and 8 cents above October 1961. Fluid use prices in the New York-New Jersey milk marketing area were 15 cents per hundredweight greater than September. In the metropolitan New York City market, store prices advanced one-half cent per quart. In other sections of the area, including northern New Jersey, home and store prices were about the same as a month earlier. Class I and home delivered prices in Buffalo were unchanged but store prices were down from 2 to $2\frac{1}{2}$ cents per quart. Philadelphia reported price increases of 40 cents per hundredweight for Class I milk and 1 cent per quart for milk delivered to homes and sold out-of-stores.

Dealers' buying prices for milk for fluid use in the East North Central Region in early October averaged \$4.61 per hundredweight. This is a rise of 1 cent from September but a fall of 7 cents from October last year. A drop of 1 cent in single quarts sold out-of-stores was the only price change reported in Canton, Ohio. Unchanged Class I single quart and half-gallon prices in Columbus, Ohio were reported but a drop of 14 cents in gallon containers at stores was reported. Prices were generally steady in Dayton, Ohio but store gallons which had been selling for as low as 59 cents in recent months returned to a 73-cent level in October. Gallon prices (in glass containers) in some stores in Ft. Wayne, Ind. declined as much as 5 cents to meet the competition of a new plastic gallon container at 69 cents per unit. Other prices in the market were steady. Alton, Ill. reported that milk in half-gallon containers, which had ranged in price from 33 to $39\frac{1}{2}$ cents last month, had stabilized at 35 cents. Other prices in this market were unchanged. In Peoria, Ill., half-gallon prices were slightly higher but gallon prices declined as much as 8 cents in some stores. Other home and store prices were about the same as the previous month. Producer prices in this market are not currently determined. In Grand Rapids, Mich., half-gallon prices increased as much as 2 cents per quart in some stores for a return to a more normal condition. Other store and home prices in this market were unchanged. Some adjustment in store prices was reported in Madison, Wis. Gallon prices were as much as 12 cents lower than September but half-gallons were as much as 4 cents higher. Producer prices were at September levels.

Fluid use milk prices in the West North Central States in early October averaged \$4.27 per hundredweight. This is a gain of 2 cents from September but a loss of 14 cents from October 1961. Home and store prices in the Minneapolis-St. Paul, Minn. markets were 1 cent per quart lower than the last month. This is a return to the level established before the "aged feed" payment program of a month ago. Half-gallons and gallons out-of-stores in

Aberdeen, South Dakota increased 2 cents per quart. Class I and home and store quarts were unchanged in this market. In Lincoln, Neb., home and store quarts advanced 1 cent per quart as half-gallons and gallons out-of-stores remained the same as the previous month. Class I prices in this market were virtually unchanged. Topeka, Kan. reported a 2-cent increase in store half-gallons. This was the only important change from the previous month in this market.

In the South Atlantic Region, Class I prices in early October averaged \$6.03 per hundredweight. This is an advance of 10 cents from September but 1 cent less than October last year. Wilmington, Del. reported an increase of 60 cents per hundredweight in Class I prices and a one-half cent rise at home and store levels. A 20-cent per hundredweight increase in Class I prices in both Baltimore and Washington, D. C. was reported. Home and store prices were unchanged in Baltimore but were 1 cent per quart over September in Washington. Home and store prices in Asheville, N. C. gained 1 cent per quart; Class I prices in this market were unchanged. In Charlotte, N. C., unchanged Class I prices were accompanied by a 1-cent per quart increase in home delivery and store milk prices.

East South Central fluid use prices in early October averaged \$5.28 per hundredweight--2 cents over September but 8 cents under October a year ago. In Memphis, Tenn., Class I prices are about the same as a month earlier. Half-gallons out-of-stores declined from 10 cents to 11 cents per unit and were the only change reported in the market. Nashville, Tenn. store quarts were 1 cent above September as store half-gallons were 1 cent lower. Other prices in this market were unchanged.

Milk for fluid use prices in the West South Central Region averaged \$5.33 per hundredweight in early October. This is a decline of 7 cents from September and is 22 cents less than October last year. Class I prices in Little Rock, Ark. were up 17 cents per hundredweight. Home delivered prices were unchanged but store prices declined as much as a cent per quart. In Shreveport, La., the only change from September prices was in gallons out-of-stores which were 3 cents less. In Galveston and Houston, Tex., price declines of 45 cents per hundredweight for Class I milk and 1 cent per quart at homes and stores was reported.

Mountain Region Class I prices in early October averaged \$5.19 per hundredweight--1 cent over September but 24 cents under October a year ago. Home delivery quarts in Denver, Colo. increased 1 cent but store quarts declined 1 cent. Half-gallons out-of-stores were from 6 to 7 cents below September. Producer prices in this market were close to month earlier levels. In Phoenix, Ariz., the only important milk price change reported from September was an increase from 6 to 7 cents in half-gallons out-of-stores.

Milk for fluid use prices on the Pacific Coast in early October averaged \$5.32 per hundredweight. This is at the same level as September but 13 cents lower than October 1961. Class I and home delivered prices in Everett, Wash. were unchanged while store quart and half-gallon prices made slight adjustments. Spokane, Wash. Class I prices were about the same as September; home and store prices declined 1 cent per quart. In San Francisco, Class I prices were unchanged but home and store prices advanced one-half cent per quart.

Omaha, Nebr.....	22.6	24	24	24	25 cities average.	25.9	26.9	27.1	27.2

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it assumed that under every other day delivery the charge represents a two quart purchase.

S-From State sources. D.R. Payment in direct ratio to milkfat. PA-Producers' association prices.

a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. FMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. j. Average of blend prices paid by all plants in the State. k. Louisiana Milk Commission minimum price. m. Mississippi Milk Commission minimum price. p. Weighted average of area pools. q. The following changes have been made for fall production fund: Added: Connecticut 17¢. r. Low bacteria count premium of 5¢ paid to all qualifying bulk tank shippers.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, JULY-AUGUST 1962

August whole milk sales 1 percent above last year

Whole milk sales (preliminary) during August on an average daily basis in 68 Federal Order and 6 State marketing areas were 78.2 million pounds. Sales at this rate were 1 percent above a year earlier, and 4 percent above the previous month. Cumulative sales in the first 8 months of 1962 were 1 percent larger than in the similar period of last year. The average milkfat test of sales of whole milk in July at 3.54 percent, was about the same as both June of 1962 and July of last year.

Skim milk sales during July up 7 percent from a year ago

Average daily sales of skim milk in 73 marketing areas during July were 7 percent above a year earlier, but 6 percent below June. Cumulative sales for the January through July 1962 period increased 7 percent from the corresponding period of last year. Only the Springfield-Worcester, Mass. market group, the Southeastern New England, and Philadelphia markets showed lower sales than in the first 7 months of 1961. The average milkfat test of skim milk sales during July at 1.17 percent was equal to the June test but above the July 1961 average of 1.14 percent.

Half-and-half sales in July down 1 percent

July daily average sales of milk and cream mixtures (most commonly known as half-and-half) were down 1 percent from a year earlier and 7 percent less than in June. Compared with July 1962, sales in the three most important markets were: Chicago and California, each down 2 percent, and Southern Michigan up 6 percent. Cumulative January-July 1962 sales were about 1 percent less than in the similar period of 1961. Sales in the first 7 months of the year were higher than a year earlier in 25 market groupings. Sales were lower in 14 and unchanged in 2.

July fluid cream sales down 3 percent

During the month of July, fluid cream sales (excluding mixtures) in 69 marketing areas declined 3 percent from July last year. Sales during this period were 12 percent lower than June 1962. January through July 1962 sales were 2 percent lower than in the corresponding period of 1961. The average July milkfat test of 24.0 percent is below both the year earlier test of 24.1 percent and the June average of 24.7 percent.

Sales of total fluid products unchanged from July 1961

Sales of total fluid products combined in 72 marketing areas during July were unchanged from the same month last year but declined 6 percent from June.

(Continued on page 27)

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets- Louisville-Lexington - Evansville, Paducah; Tennessee - Chattanooga, Knoxville, Memphis, and Nashville; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

In the first 7 months of 1962, sales were 2 percent above the comparable period of last year. Within the 44 market groupings, sales for the first 7 months of 1962 were higher than a year earlier in 31 areas, lower in 6, and unchanged in 7. The average milkfat test in July, at 3.65 percent, compared with 3.68 percent in July of 1961 and 3.67 percent in June this year.

Receipts during August 2 percent above last year

August receipts of whole milk in 76 Federal Order and 5 State marketing areas, on an average daily basis, were 2 percent higher than in the same month last year. August receipts were 3 percent below July. Receipts per producer, at 705 pounds per day, were 6 percent above August 1961. The August average milkfat test of receipts was 3.58 percent, the same as in July but below the average of 3.61 percent in August a year ago.

September milk production at record high

Milk production in the United States during September is estimated at 9.7 billion pounds. This is six-tenths of a percent above the previous record high for September, set last year, and 4 percent above the 1951-60 average for the month. The August to September seasonal decline in milk production of 5 percent compares with 6 percent in 1961. Milk production in the first three quarters of this year is 1 percent above the comparable period of 1961. Relative to population, September milk production amounted to 1.73 pounds per person daily, compared with 1.75 pounds a year earlier.

7M 34M FLUID MILK AND CREAM REPORT
NOVEMBER 1962

November 16, 1962

SUMMARY

Early November milk for fluid use prices were changed from October levels in relatively few markets, the Crop Reporting Board reports. Fluid use prices moved up significantly in 5 markets and were down in only 3. Home delivered quarts were higher in 2 markets and lower in 2. Store quart prices advanced from October in 5 markets but declined in 6. Half gallons out-of-stores were up in 6 markets and down in 7. Gallon jug prices increased in 2 markets and decreased in 4.

Average buying prices paid by dealers for milk used for fluid purposes in about 160 markets averaged \$5.52 per hundredweight in early November -- 1 cent higher than October, but 5 cents lower than in the same month last year. Currently, prices are 14 cents per hundredweight below the 1956-60 average for November. Prices averaged about the same as October in 3 areas, but were slightly lower in 1 and higher in 5. Compared with a year earlier, the average this month was lower in 7 of the 9 regions. Large decreases were: 19 cents, West South Central Region; 15 cents, West North Central; and 13 cents, Pacific Coast. The November average was unchanged from last year in New England, but was 2 cents per hundredweight higher in the Middle Atlantic States.

Prices for the most common grade of whole milk delivered to homes in single quart containers averaged 27.2 cents in early November. This is equal to the October average but two-tenths of a cent above November 1961. Compared with the 1956-60 average for November, the current price is 1.3 cents higher. Except for a 1-cent per quart decline in the Denver market, all markets remained unchanged from the previous month.

September whole milk sales (preliminary) in 68 Federal Order and 6 State marketing areas were 7 percent above August, but 2 percent below September a year ago. Sales of whole milk during the first 9 months of 1962 were about 1 percent greater than the comparable period of 1961. August sales of skim milk items in 73 marketing areas increased 9 percent from a year earlier and were 5 percent higher than in July. Sales of milk and cream mixtures (half-and-half) during August were unchanged from a year earlier, but 4 percent greater than July. Daily average sales of fluid cream (excluding mixtures) in 69 marketing areas were 2 percent less than in the same month of last year, but advanced 1 percent from July. Combined sales of all fluid products in 72 marketing areas during August were 2 percent above a year ago and 5 percent higher than July. Sales of all fluid products in these areas for the first 8 months of the year were 2 percent greater than for the same period last year.

CURRENT SERIAL RECORDS

PRICES IN FLUID MILK MARKETS, NOVEMBER 1962

Dealers' buying prices for Class I milk in New England in early November averaged \$6.24 per hundredweight. This is the same as both October this year and November last year. The only reported price change for the region shows a 1-cent increase in half-gallons out-of-stores in Hartford, Connecticut.

Class I prices in the Middle Atlantic States averaged \$6.33 per hundredweight--4 cents higher than October and 2 cents over November 1961. Class I prices in Buffalo, N. Y. were unchanged, but various adjustments were made in home and store prices as a result of competitive factors. The Class I price in the New York-New Jersey marketing area increased 5 cents per hundredweight. The only other change reported in the area was a 1- to 2-cent per quart decrease in home delivery and store quart prices in Northern New Jersey following the relaxation of State milk price control.

East North Central milk for fluid use prices in early November averaged \$4.57 per hundredweight. This is 4 cents less than October and 9 cents below November a year ago. Class I and home delivery prices in Akron and Canton, Ohio were unchanged from October. Some minor changes occurred in prices out-of-stores. The Cincinnati Class I price declined 8 cents per hundredweight, with home delivery and store quarts and half-gallons 1 cent per quart higher. Gallon jug prices were at October levels. Dayton, Ohio Class I prices decreased 9 cents per hundredweight. Home delivery quarts were up 1 cent while store half-gallons and gallons declined slightly. Alton, Ill. Class I prices were about the same as October. Half-gallons out-of-stores resumed previous levels following a highly competitive situation which had lowered prices. In Peoria, Ill. where producer prices are not currently determined, home delivery prices were unchanged from October. Store half-gallons dropped from 1 to 5 cents per unit but gallon jugs were unchanged. In Springfield, Ill., milk for fluid use prices have not yet been reported for November. Home delivery prices were unchanged from October but store prices declined from 1 to 2 cents per quart. Class I prices were 19 cents per hundredweight lower than October but home and store prices were unchanged in Superior, Wisconsin.

In the West North Central Region, fluid use prices in early November averaged \$4.28 per hundredweight--1 cent above October but 15 cents below November last year. Duluth, Minn. reported a 9-cent per hundredweight loss in the Class I price but no change in home and store prices. Class I and home delivery prices in Aberdeen, S. D. were about the same as October. Store prices were as much as a cent lower than the previous month. In Lincoln, Neb., home delivered and out-of-store quarts dropped 1 cent; other prices in this market were unchanged. In the Greater Kansas City marketing area, the only important price changes were for store half-gallons in Kansas City and Topeka, Kans. Kansas City, Kans. reported a 12-cent increase in the price for this unit while Topeka reported prices unchanged to 2 cents higher. Wichita, Kans. Class I prices advanced 8 cents per hundredweight. All other reported prices in the market were unchanged except gallon jugs which were steady to 2 cents lower.

South Atlantic Class I prices in early November averaged \$6.03 per hundredweight. This is the same as the previous month but 1 cent below November last year. Class I prices in all North Carolina markets rose 24 cents per hundredweight. Some home and store prices in Asheville advanced following the lead of other markets of the State last month.

Milk for fluid use prices in early November for the East South Central Area advanced \$5.32 per hundredweight. This is 3 cents above last month but 3 cents below November last year. The only important price changes reported were in Chattanooga, Tenn. where half-gallons were 2 cents per unit lower and gallons were unchanged to 4 cents lower.

West South Central Class I prices in early November averaged \$5.37 per hundredweight--3 cents above October but 19 cents lower than November 1961. Class I prices declined slightly in Little Rock, Ark. Home delivered prices were unchanged. Store quart prices were slightly less than those in October but half-gallons advanced slightly. In Shreveport, La., Class I home delivery and store half-gallon prices were unchanged; store quarts were down a cent, but gallon jugs increased 9 cents. Class I prices in Tulsa, Okla. were 15 cents per hundredweight higher; home and store prices in that market have not as yet been reported. El Paso, Tex. Class I prices were 9 cents per hundredweight more than last month. Home delivery prices stayed the same as the previous month but store prices for quarts were slightly higher and for half-gallons slightly lower.

November fluid use prices in the Mountain Region averaged \$5.20 per hundredweight. This is 1 cent over October but 6 cents under November a year ago. Class I prices in Denver were stable. Single quarts at homes and stores dropped a cent. Store half-gallon prices were not reported. Phoenix, Ariz. Class I, home delivery and store quart prices were the same as October. Half-gallons out-of-stores dropped from 16 to 20 cents per unit as unsettled conditions in the market prevailed.

Milk for fluid use in Pacific Coast markets in early November averaged \$5.32 per hundredweight--unchanged from October but 3 cents below November last year. No important price changes for the region were reported this month.

Omaha, Nebr.....	22.6	24	24	24	25 cities average.	25.9	27.0	27.2	27.2

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

S-From State sources. D.R. Payment in direct ratio to milkfat. PA-Producers' association prices.
a. Federal Order markets unless otherwise noted. b. Prices paid to all or the major group of producers in the market for milk used for fluid consumption. For Federal markets, Class I prices including negotiated premiums. For minimum Class I price, see Table 1(a) for respective month. d. Prices paid to all or the major group of producers in the market for all pooled milk. Federal market prices include general premiums negotiated by principal producers' associations. Bulk tank (see Table 4) or other special premiums not included unless indicated. e. PMCC Area I price for milk produced in Pennsylvania. f. Individual handler pool. Weighted average of handlers' prices. g. Negotiated prices paid members of principal producers' associations. i. Average of blend prices paid by all plants in the State. k. Louisiana Milk Commission minimum price. m. Mississippi Milk Commission minimum price. p. Weighted average of area pools. q. The following changes have been made for fall production fund: Added: Connecticut, 17¢; Columbus, 31¢; Dayton-Springfield, 26¢; Cincinnati, 33¢; Fort Wayne, 38¢; Indianapolis, 37¢; Sioux City, 36¢; Nebraska - Western Iowa, 39¢; Louisville-Lexington-Evansville, 41¢. r. Low bacteria count premium of 5¢ paid to all qualifying bulk tank shippers. s. July and August blend \$3.55 and \$3.80 at Quad Cities; August blend \$4.49 at Ardmore-Lawton.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, AUGUST-SEPTEMBER 1962

Whole milk sales in September 2 percent lower than 1961

Daily sales of whole milk during September (preliminary) in 68 Federal Order and 6 State marketing areas averaged 83.7 million pounds. This is 7 percent above August, but 2 percent smaller than the 85.9 million-pound daily average in September a year ago. Users of these data should bear in mind that delivery patterns may have affected these comparisons. There were 5 Sundays in September 1962 but only 4 in September 1961. Likewise, there were 4 Fridays in September of this year but 5 in the same month last year. Many firms do not deliver to homes on Sunday; Friday is usually a day for "stocking up" for weekend sales in stores. Sales of whole milk during the first 9 months of 1962 were 1 percent greater than the comparable period of 1961. The August average milkfat content at 3.54 percent was unchanged from July and compared with 3.55 percent during the same month last year.

Skim milk sales up 9 percent in August

August sales of skim milk items in 73 marketing areas increased 9 percent over a year earlier and were 5 percent higher than July. Sales for the first 8 months of the current year gained 7 percent over the year earlier level. With the exception of the Springfield and Worcester, Mass., market grouping and South-eastern New England, most other areas recorded a gain in sales for the first 8 months of this year compared with last year. New Jersey, Philadelphia, and Southern Michigan were the only markets in which cumulative sales were unchanged from a year earlier. The average milkfat content of August sales was 1.19 percent. Year-earlier sales averaged 1.15 percent milkfat and July sales 1.17 percent.

August half-and-half sales unchanged

Sales of milk and cream mixtures (half-and-half) during August were unchanged from a year earlier, but 4 percent greater than July. In the three largest markets, which together accounted for slightly over half of total sales for the group, sales differences were as follows: Chicago and California, both 2 percent less than a year ago, and Southern Michigan up 4 percent. January through August sales were 1 percent below the comparable period of 1961.

Sales of fluid cream 2 percent less than August last year

During the month of August, daily average sales of fluid cream (excluding mixtures) were 2 percent less than in the same month of last year. However, sales advanced 1 percent from July. Total sales for the January through August period were 2 percent smaller than for the corresponding period of last year. The August milkfat test of fluid cream items at 23.7 percent was unchanged from a year earlier, but slightly under the 24.0 percent average for July.

Total fluid product sales 2 percent above a year earlier

Combined sales of all fluid products in 72 marketing areas during August were 2 percent above a year ago and 5 percent higher than July. Sales for January through August were 1.7 percent larger than for the comparable period of last year. The average milkfat test of sales of all fluid products of 3.64 percent is slightly less than both the August 1961 average of 3.67 percent and 3.65 percent in July 1962.

Continued on page 27

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets - Louisville-Lexington-Evansville, Paducah; Tennessee - Chattanooga, Knoxville, Memphis, and Nashville; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

September receipts 3 percent higher

Receipts of whole milk daily in 76 Federal Order and 5 State marketing areas during September were 3 percent over the same month last year and 3 percent more than August. Receipts per producer amounted to 728 pounds daily, compared with 679 pounds a year earlier and 705 pounds in August. The average test of receipts in September was 3.66 percent, compared with 3.65 percent for September last year.

Milk production up 1 percent in October

Mild weather coupled with good dairy pasture feed conditions sustained a high milk flow during October. The current October United States milk production estimate of 9.8 billion pounds is both 1 percent higher than the September figure and the previous record for the month set last year. Total production in the January through October period also is 1 percent larger than in the comparable period of last year. October production was equivalent to a daily per capita rate of 1.69 pounds, compared with 1.70 pounds a year earlier and the 10-year average for the date of 1.74 pounds.

FLUID MILK AND CREAM REPORT

DECEMBER 1962

FEB 20 1963

December 19, 1962

CURRENT SERIAL RECORDS
SUMMARY

Fluid milk prices in early December were generally steady to seasonally lower, the Crop Reporting Board reports. Fluid use prices declined in 19 or 1 in about 8 markets but advanced in 3 markets. Consumer price changes were also limited as 2 markets reported increases in home delivered prices. Price changes for out-of-store sales were as follows: Quarts, up in 3 markets, but down in 7; half-gallons, higher in 7, but lower in 6; and gallons, increases in 2, but declines in 2.

Prices for fluid use milk in early December averaged \$5.47 per hundred-weight. This is 3 cents less than November and 7 cents under December last year. Averages were slightly higher in 4 of the 9 regions. Regional averages were unchanged in 3 areas but were 9 and 10 cents lower, respectively, in the important Middle Atlantic and West North Central States. Compared with December last year, the averages were lower in 6 of the 9 regions. These decreases ranged from 6 cents per hundredweight in the Middle Atlantic States to 13 cents both in the West South Central and Pacific. The averages were unchanged from November in New England and 1 cent per hundredweight higher in the South Atlantic and East South Central Regions.

The prevailing price of the most common grade of whole milk delivered to homes in 25 cities in early December averaged 27.1 cents per single quart. This is one-tenth of a cent lower than in November but one-tenth cent higher than December 1961. Compared with the 1956-60 December average of 26.0 cents, the current price is 1.1 cent higher. Except for a 2-cent per quart drop in Kansas City, Mo., and a 1-cent decline in Denver, all other markets in the group were unchanged.

Preliminary data in 68 Federal Order and 6 State marketing areas show October whole milk (average daily basis) sales at 3 percent above both September this year and October 1961. Sales of whole milk for the January-September 1962 period were nearly 1 percent greater than in the corresponding period last year. Sales of skim milk items (average daily) in 73 marketing areas during September were unchanged from August, but 4 percent over September a year ago. Milk and cream mixtures (half-and-half) sales in 68 marketing areas were unchanged from August, but 4 percent lower than in September 1961. Fluid cream sales during September were 2 percent less than August and 5 percent below September a year earlier. All fluid product sales in 72 marketing areas during September were up 6 percent from August but were down 2 percent from September a year ago. Sales of all fluid products in the January through September period of this year were 1 percent larger than in the corresponding period last year.

PRICES IN FLUID MILK MARKETS, DECEMBER 1962

Early December dealers' buying prices for Class I milk in New England averaged \$6.24 per hundredweight--unchanged from both a year earlier and November. No important changes in prices were reported for this region.

Prices for fluid use milk in the Middle Atlantic States averaged \$6.16 per hundredweight in early December. This is 10 cents below November and 6 cents less than December 1961. Class I prices in the New York-New Jersey marketing area were 15 cents per hundredweight lower. Home and store prices in most of the New York portion of the area were unchanged. In Binghamton, some quart and half-gallon prices out-of-stores were 1 to 2 cents per quart below November. Northern New Jersey home and store prices were unchanged to 2 cents per quart lower following the suspension of State price controls and the reinstitution of temporary regulations. Although dealer prices in Buffalo were unchanged, some store quarts were up 1 cent; half-gallons, 3 cents; and gallons, 12 to 14 cents per container, as price war conditions were relaxed.

East North Central fluid use prices, at \$4.58 per hundredweight in early December, averaged the same as November but were 8 cents below December last year. In Evansville, Ind., Class I prices were virtually unchanged. Home delivery quarts were up 1 cent while store quarts were unchanged and store gallons were unchanged to 2 cents higher. Peoria, Ill. store prices showed substantial increases for both half-gallons and gallons. Producer prices in this market are not currently determined. In Rock Island, Ill., the Class I price was 17 cents below November; home and store prices were unchanged. The Class I price in Rockford, Ill. was 15 cents lower but home and store prices in this market were unchanged. Home delivery prices in Springfield, Ill. were the same as the previous month. Quart prices in some stores were down 1 cent but half-gallons increased slightly. In Detroit, Mich., home delivery and store half-gallon prices were unchanged, but prices of quarts in some stores were down 1 cent. Producer prices in this market are not currently determined. Green Bay, Wis. reported a 15-cent per hundredweight decrease in the Class I price but no price changes at homes and stores. Superior, Wis., and Duluth, Minn. Class I prices declined 17 cents per hundredweight. Consumer prices in these markets were reported unchanged.

In the West North Central Region, Class I prices in early December averaged \$4.20 per hundredweight--9 cents under the previous month and 11 cents under the same month last year. In the Minneapolis-St. Paul, Minn. area, Class I prices were below November levels by 14 cents per hundredweight. Most consumer prices were steady but there was some weakness in prices of half-gallons and gallons sold out-of-stores. Des Moines-Ft. Dodge, Iowa Class I prices declined 17 cents per hundredweight; home and store prices in these markets did not change from the levels reported last month. St. Louis-Springfield, Mo. Class I prices were down 15 cents per hundredweight. Home and store prices in these markets as reported were unchanged from November. Aberdeen, S. D. reported unchanged. Class I and home delivery prices. Store prices were 1 cent higher for single quarts but showed little change for half-gallons and gallons. In Kansas City,

Kans., a price war at stores was in evidence starting about November 20. However, by December 4, current prices had returned to early November levels. Wichita, Kans. reported a 13-cent per hundredweight increase for fluid use milk but no change in consumer levels.

Dealers' buying prices for milk for fluid use in the South Atlantic Region averaged \$6.04 per hundredweight in early December. This is 1 cent above both November this year and December last year. The only reported price change for the region was in Huntington, W. Va. where the Class I price was 30 cents per hundredweight lower. A 90-cent per hundredweight increase from July to August was reported earlier.

Class I prices in early December for markets in the East South Central Region averaged \$5.33 per hundredweight--1 cent above both November 1962 and December 1961. Substantial increases in store half-gallons occurred in Memphis, Tenn., as the market was reported as stabilizing for the first time in many months. Class I prices and other home and store prices were about the same as last month. The only price change reported in Nashville, Tenn. was a 1-cent per quart decrease in price for milk in quart containers at stores.

West South Central prices of milk for fluid use in early December averaged \$5.40 per hundredweight. This is 4 cents higher than last month but 13 cents lower than December last year. Class I prices in Baton Rouge and Shreveport, La. were unchanged. Some upward adjustment in store half-gallons and gallons was reported in Baton Rouge, and a downward adjustment at Shreveport. Oklahoma City reported unchanged quart prices both to home and stores but a substantial decline in both store half-gallons and gallons. Producer prices in this market have not as yet been reported. In El Paso, Texas, the Class I price was up 8 cents per hundredweight. Home delivery prices were unchanged; store gallons dropped 1 cent, but half-gallons in some stores increased 1 cent per quart. In Houston, Tex., unchanged Class I and quart prices at homes and stores were reported. Half-gallons at some stores were 4 cents lower while gallons were as much as 10 cents lower in some stores to 2 cents higher in others.

Prices for fluid use milk in the Mountain States in early December averaged \$5.25 per hundredweight. This is 5 cents more than last month but 10 cents less than December last year. In Albuquerque, N. M., an increase of 8 cents per hundredweight for Class I milk was reported. There was also an increase of about 1 cent per quart at home and store levels. Phoenix, Arizona reported a slight increase in Class I prices. Home and store quart prices were unchanged but half-gallons out-of-stores were from 5 to 6 cents per unit higher. In Salt Lake City, Class I prices advanced 13 cents per hundredweight. Home and store prices were the same as reported last month.

On the Pacific Coast, Class I prices in early December averaged \$5.32 per hundredweight--about the same as November but 13 cents under December a year ago. The only reported change for this region was a 13-cent increase in the Class I price for Spokane, Washington.

a. The prices shown are the latest reported up to and including the 10th of the month. Grades may vary between markets due to differences in determining factors.

b. In markets having a service charge on the first unit at each single delivery location, the charge has been divided between 2 quarts. Since the single quart concept used historically is based on every day delivery, it is assumed that under every other day delivery the charge represents a two quart purchase.

Low bacteria count premium of 5¢ paid to all qualifying bulk tank shippers. s. Negotiated Class I \$4.16 for August and September at North Central Iowa.

SALES OF MILK AND CREAM AND RECEIPTS FROM PRODUCERS IN CERTAIN
FEDERAL ORDER AND STATE MARKETING AREAS, SEPTEMBER-OCTOBER 1962

October whole milk sales 3 percent over 1961

Whole milk sales (preliminary) during October in 68 Federal Order and 6 State marketing areas averaged 86.2 million pounds per day. At this level, sales were 3 percent above September and also 3 percent higher than in October a year ago. There were 4 Sundays in October 1962, but 5 in both October 1961 and September 1962. Total sales of whole milk for the January-September period were nearly 1 percent greater than in the corresponding period last year. The September average milkfat test of sales, at 3.55 percent, shows a slight gain over the August average of 3.54 percent, but is equal to a year earlier.

Sales of skim milk during September up 4 percent from a year earlier

Sales of skim milk in 73 marketing areas during September averaged 7.4 million pounds per day--unchanged from August, but 4 percent greater than in September 1961. Consumer purchases of skim milk in the first three-quarters of this year were 7 percent greater than in the comparable period last year. Gains were recorded in 40 of the 45 market groupings shown. Losses were experienced in 3, but in 2 groups sales were unchanged. The September average milkfat test of skim milk sales, at 1.20 percent, compares with 1.19 percent in August and 1.17 percent a year earlier.

Half-and-half sales 4 percent under last year

September average daily sales of milk and cream mixtures (half-and-half) in 68 marketing areas, at 1.2 million pounds, were unchanged from August but were 4 percent smaller than September 1961. Sales in the first 9 months of the year were nearly 1 percent lower than in the comparable period last year. In the three largest markets, sales for the January-September period in relation to the previous year were as follows: Chicago, down 5 percent; California, down 3 percent; and Southern Michigan, up 3 percent. The average milkfat test of half-and-half sales for September, at 11.8 percent, is unchanged from both August 1962 and September 1961.

Fluid cream sales down 5 percent

Sales of fluid cream during September, on an average daily basis, were 2 percent less than August and 5 percent below September 1961. Total sales in the first 9 months of the year were 2 percent under comparable 1961 figures. Sales in 29 of 42 market groupings were reduced from last year, but 12 groups recorded sales increases, and 1 no change. The September milkfat test of fluid cream sales was 23.9 percent, slightly higher than the average of 23.8 percent in both August of this year and September of 1961.

September total fluid sales off 2 percent

Sales of all fluid products combined in 72 marketing areas during September, at 76.1 million pounds daily, were up 6 percent from August, but were 2 percent under a year earlier. Sales of all fluid products in the January through September period were 1 percent larger than in the corresponding period of 1961. The average milkfat test of September sales of all fluid products, at 3.59 percent, compares with 3.64 percent in August and 3.65 percent in September a year ago.

(Continued on page 27)

a. Quantities include all items shown in prior tables (except whole milk in the Federal markets of New York and all cream and mixtures of milk and cream in Boston, Springfield and Worcester) sold in defined marketing areas (Federal areas adjusted for comparability where necessary); data are revised for earliest date shown, preliminary for others. See page 27 for markets combined. S- Data from State sources.

b. Computed from unrounded data. Average fat test for 67 areas where test is available for all comparisons.

Compiled from reports of Market Administrators and State milk control agencies.

- a. Quantities include receipts of milk from producers by handlers regulated in the respective marketing areas; data are revised for earliest date shown, preliminary for others. See below for markets combined.
b. Federal totals less receipts from New Jersey producers as reported by the Office of Milk Industry.
^S- Data from State sources. ^d. Data comprise plant receipts of Grade A milk from producers in the State.
^e. Preliminary.

Compiled from reports of Market Administrators and State milk control agencies.

MARKET COMBINATIONS IN SALES AND RECEIPTS TABLES

The following marketing areas have been combined in the sales and receipts tables of this report: Northern Ohio - North Central, Northeastern and Toledo; other Ohio - Cincinnati, Columbus and Dayton-Springfield; Indiana - Fort Wayne and South Bend-LaPorte-Elkhart; Iowa - Cedar Rapids-Iowa City, Quad Cities-Dubuque, Des Moines, North Central and Sioux City; South Dakota - Black Hills and Sioux Falls-Mitchell; Kansas - Neosho Valley, Southwest and Wichita; Two Kentucky-Indiana markets - Louisville-Lexington-Evansville, Paducah; Tennessee - Chattanooga, Knoxville, Memphis, and Nashville; Mississippi - Mississippi-Delta, Central and Gulf; Louisiana - New Orleans and Northern; Texas - Austin-Waco, Corpus Christi, Central West, San Antonio and Panhandle; Colorado - Colorado Springs-Pueblo and Western.

(Continued from page 20)

Receipts from producers during October gain 2 percent

October milk receipts from producers in 76 Federal Order and 5 State marketing areas on an average daily basis gained 2 percent from a year earlier. The number of producers declined 5 percent. Average receipts per producer were up 7 percent from a year earlier.

November milk production a new record

November milk production in the United States is estimated at 9.3 billion pounds, 1 percent more than the previous November record set in 1961, and 10 percent above the 1951-60 average for the month. Production usually drops to a seasonal low in November. However, the increasing number of record highs for the month in the past several years is partly a reflection of the trend toward leveling out the fall decline in production. For the first 11 months of the year, milk production totaled 1 percent more than in the corresponding months last year. On a per capita basis, November production of milk provided 1.66 pounds daily, compared with 1.67 pounds a year earlier.
